

## Building Blocks - Daisy School, Bangalore, India Preschool Graduation

A total of 37 pre-school children graduated this year from Building Blocks-Daisy School, built and operated, with grants from the ECOM Foundation. All the 37 children will attend Whitefield Public School

with their fees covered by other corporate sponsors through grade 10. Daisy School is in the

process of becoming sustainable through additional corporate participation. Video: <http://youtube/aO12Apmcfc>

### T-Shirt Design Contest Winner from El Salvador Schools Announced:

Congratulations to Sara Navarro, an eighth grade student attending

Sara Pohl de Borgonovo school in San Miguel, El Salvador, whose T-shirt design took First Place in a contest sponsored by ECOM Foundation for students in El Salvador. The T-shirts will be sold to raise funds for ECOM Foundation projects.

Second Place winners are: Miriam Joya, Milton Castro, and Tatiana Sorto. **CONGRATULATIONS ALL!**

### Grounds for Health: Nicaragua & Peru

ECOM Foundation partners with GFH to recruit community leaders from among staff associated with coffee companies and warehouses, and train them as Community Health Promoters. They are then equipped with information

and tools necessary to sensitize staff and community members on cervical cancer prevention, and identify and recruit women in the target group for screen-and-treat services.

### Educate! - Uganda

**Educate!**, with support from the ECOM Foundation, announced last month that they expanded their reach and successfully launched the Educate! model in over 200 schools across Uganda, reaching more than 20,000 students. Iki Iki High School hosted their first Community Day in April, where

students worked enthusiastically and tirelessly cleaning their school and surrounding community, including the trading center, police compound, and a local health center. Scholars impacted their community and engaged local policy makers. Community members expressed support and were in awe of the students' work!
