

## ECOM Foundation Partners with Grounds for Health

As important as the lives they save, Grounds for Health cancer-screening, treatment and training programs also help support the establishment of essential, ongoing health infrastructure in rural communities, strengthening the overall quality of life in these regions.

This focus is very much in keeping with ECOM Foundation's core mission of supporting projects that ensure the social, economic, and environmental well being and sustainability of rural growers, their families, and communities in underdeveloped countries.

Medical Training in Peru

Country-Specific Goals and Objectives for 2015-2016 are to expand cervical cancer prevention services in Northern Nicaragua, and to broaden the reach of programs in the San Ignacio province of Cajamarca, Peru.

The Single Visit Approach has been shown to successfully cure up to 90% of all detected pre-cancers.

## ECOM Foundation November Fundraiser ~ Thank You!

Rekerdres Insurance Agency ~ Dallas/ACS (Houston)/ASCO(California) ~ Switzerland

The ECOM Foundation expresses our heartfelt gratitude for the generous donations to the Fundraiser on November 12<sup>th</sup>, 2015. Not only did sponsoring donations help to create a delightful evening of raffles and auctions, all contributions went towards funding our projects in education, health and social programs for rural coffee, cotton and cocoa growing regions around the world.

Because of all contributions, together, we can work to ensure a better life for farmers, their families, and communities. This includes the expansion of ECOM Foundation's Satellite School Program throughout Mexico, El Salvador, and Guatemala to deliver computer educational systems to students and adults of the area's farming communities. Also our work with other non-profits through family and youth empowerment programs in Uganda, Kenya and Nigeria, and the "Same Day Screen & Treat" clinics to combat cervical cancer in Tanzania, Nicaragua, Mexico and Peru.

Your partnership with the ECOM Foundation brings much needed aid to origin producing communities, and makes a profound impact on the sustainability of their agricultural practices. Thank you so very much. We truly can't do it without you.

*"Together we can make a difference in their lives."*
